Subject: FYI on PPH

Just wanted to pass along a message regarding the PPH detection levels that the PPH team has been working on. The dial in info is for a call this morning at 10:00. I did not participate on this call – more of a lab issue, but I am included in the distribution.

Conference Call Information:

Dial In: Ex. 6 - Personal Privacy

Meeting Room: Ex. 6 - Personal Privacy

All,

REIC Laboratory reports they can detect PPh/DiPPh at less than 10ppb with 20 ml of sample. We are providing them with historic samples from 10-13 Jan so they can look back at those samples for PPh/DiPPh. They are reporting on the current samples at 1.04 ppb level. (Correct me if I am wrong Ray Erickson)

Jeff McIntyre is planning on sending out conference call regarding PPh for 10:00 a.m., Monday 27 Jan. We appreciate everyone's assistance with this incident.

Thanks,
Greg

Greg Grant, LTC, WVARNG
